

I love the radio stations the way they are right now, especially Air1. If the new style of FM transmission goes through, then Air1 will have trouble broadcasting. It is a great positive show that helps people calm down in TRAFFIC in LOS ANGELES. I know this for myself and for others that listen to the station. Positive music does make a difference in a person's day. They are already struggling with their funds and broadcasting that switching to the new FM style would hinder that even more. Please let them stay on the air the way they are now. Thanks
